Elektroautomatik becomes exclusive agent for NILES-SIMMONS in Sweden

Elektroautomatik, through its business unit Elektroautomatik Machine, has signed an exclusive cooperation agreement, making the company the official distributor and partner for NILES-SIMMONS in Sweden.

NILES-SIMMONS, brand of the international NSH Group, is a world-leading supplier of high-tech machining equipment such as horizontal lathes, turn-mill centers and vertical machines. With a strong focus on precision, flexibility and reliability, their machines are particularly sought after in industries such as aerospace and defense, automotive, energy and heavy industry – sectors where the demands on quality and productivity are at the highest level.

What sets NILES-SIMMONS apart is their broad portfolio and ability to deliver complete production solutions – from stand-alone machines to fully turnkey production lines. They also have extensive experience in advanced process integration and customized solutions for very large and complex workpieces. This makes them a strong partner for industries with high demands on both flexibility and future-proof technology.

– We are very proud to represent such a strong and well-respected brand as NILES-SIMMONS. By adding their technology to our portfolio, we strengthen our ability to deliver advanced and customized solutions to the Swedish industry, says Johan Willbo, Sales Manager at Elektroautomatik Machine.

Through its Machine business unit, Elektroautomatik offers turnkey production solutions covering everything from concept studies and project management to installation and commissioning of complete production cells. The cooperation with NILES-SIMMONS further reinforces Elektroautomatik's position as a strategic partner for companies with high demands on machinery, technical services and automation.

About Elektroautomatik:

Elektroautomatik is Sweden's largest automation integrator and a full-service provider within automation. The company offers customized automation solutions, AGVs, high-quality machinery, training and service – all designed to streamline and ensure the quality of customers' production and logistics. With expertise ranging from concept to final production and a broad competence base, Elektroautomatik is a complete partner for sustainable and innovative solutions.

About NILES-SIMMONS:

NILES-SIMMONS is a brand of the international machine tool manufacturing group NILES-SIMMONS-HEGENSCHEIDT GmbH (The NSH Group) located in Chemnitz, Saxony.

Organized within Saxony-based NSH Technology GmbH (together with the brands RASOMA and WEMA GLAUCHAU), the NILES-SIMMONS brand specializes primarily in the development and manufacture of customer-specific machine tools in the field of horizontal TURN-MILL centers and lathes.

Its business activities are focused on research, development, manufacturing, and sales of machine tools with the goal of producing equipment of the highest quality, innovation, and energy efficiency.

The NSH Group designs and manufactures a wide machine range of horizontal TURN-MILL machining centers, horizontal, and vertical lathes, 5-axis milling centers, grinding, and rolling machines, automation solutions as well as special purpose machines for the railway and automotive sector. In addition, it is one of the world's leading suppliers of turnkey solutions for the design and implementation of entire production lines and cells.
